PROGRAM OVERVIEW Community Health Network Podiatry residents are provided a diverse education in all aspects of podiatric medicine including: sports medicine, surgery, inpatient care, advanced wound care, and private office management. Prospective residents can expect an abundance of first-hand surgical experience, including forefoot procedures, trauma, reconstructive rearfoot and ankle cases as well as experience in a surgical based resident run clinic with an orthopedic attending. Currently, residents cover 8 hospitals and 6 surgery centers in an expanding health network with a receptive orthopedic community. All residents are given the opportunity to participate in research, and there is ample opportunity for publication. Journal club, surgical workshops, and PRESENT lectures provide continued didactic experiences. Residents enjoy complimentary meals while on duty. Resident salary and benefits provide for a comfortable lifestyle in a clean and safe major metropolitan area boasting professional sports teams, plentiful outdoor activities, attractive cost of living, and family-friendly activities.
