PROGRAM OVERVIEW Our residency places a large emphasis on academics. Weekly journal clubs, online lectures, guest lectures, cadaver workshops, case presentation and grand rounds comprise our didactic schedule. Our residents attend outside podiatric lectures and participate in programs offered by the New York College of Podiatric Medicine and other surrounding Metro NY institutions. By the completion of the third year, each resident is expected to have completed a case presentation and/or a paper of publishable quality.

Having a large podiatric attending staff provides residents with a multitude of surgical cases and procedures. In addition, the podiatry service has an excellent working relationship with the Department of Orthopaedics affording our residents the opportunity to assist on a great majority of surgical cases including all foot and ankle trauma.
