**PROGRAM OVERVIEW** High-paced program dealing with a full variety of medical and surgical pathologies. Busy daily clinic from which residents develop superior skills and ability to work surgical cases. All residents easily exceed surgical numbers. Interdisciplinary care is emphasized and you will work with general, orthopedic, and vascular surgery, infectious disease, physical therapy, prosthetics, social work, radiology, emergency medicine, pathology, psychology-psychiatry and other specialties on a daily basis. 20% of your time is spent in external private practice podiatric surgical rotations in the Dayton metro area. Graduates obtain broad experiences in caring for complex patients in both the inpatient and outpatient settings. When you finish residency you will be able to start practice with confidence you have already treated all possible podiatric conditions and complications whether the treatment needed is conservative, surgical, wound care or biomechanical. Coding is emphasized so you can be successful in private practice right out of the box. Research opportunities are available.
