PROGRAM OVERVIEW

A comprehensive clinical and academic approach to all areas of Podiatric Medicine & Surgery. We have a varied & busy surgical schedule with hands-on resident experience as a key component of our training program. We take the training of each & every one of our residents individually & cooperatively as the primary objective of the program. The residents are given opportunities to attend & receive advanced training, certification in workshops and seminars. The size & nature of the program itself supports & promotes a great amount of activity in both the academic & clinical aspects of the program. The surgical quantity & quality, the inpatient & outpatient clinical activity & the volume of cases in the ER all reflect this devotion to advancing & improving the type & level of education & clinical experiences. Our academic schedule consists of daily rounds and teaching faculty are all involved providing lectures, journal review, cadaver labs on site, radiology review & a variety of regularly scheduled workshops & guest lecturers.
